

PRESS RELEASE

## Software manufacturer One Data strengthens management with technology expert Dr. Gregor Wiest as new CFO/COO

Passau, January 31, 2023 - At the turn of the year, Dr. Gregor Wiest was appointed as the new Managing Director and Chief Financial / Operating Officer (CFO / COO) of software manufacturer and data integration One Data. He thus joins managing partners Dr. Andreas Böhm and Dr. Stefan Roskos on the management board of One Data GmbH.

With Gregor Wiest, One Data has gained an internationally experienced expert in innovation and digital transformation. As CFO / COO, he will assume responsibility for commercial, financial and operational issues and manage the company's investor relations. „We are very pleased to have found an excellent manager, financial expert and multiple award-winning innovation expert in Gregor, who complements our management team perfectly. With his expertise in strategic and operational business issues, Gregor will be instrumental in helping us to further drive One Data's successful growth trajectory;“ said Andreas Böhm, founder and Managing Director of One Data.

Gregor Wiest was most recently Head of Innovation & Digital Transformation at ERGO Group AG, where he was responsible for global innovation activities. He made a significant contribution to ERGO's digitization success by building up proprietary technology areas such as AI, Voice or Process Mining, for which he and his innovation team received several awards. Prior to that, he worked for the management and business consultancy Bain & Company for eight years, among others.

„During my time in the insurance industry, I have experienced that the value-added preparation of data is an enormous challenge;“ explains Gregor Wiest. „Data lies in data silos that are separate from one another, and the preparation and networking of this data ties up enormous resources. Against this backdrop, I have been working intensively on the question of how the value-added preparation of data can succeed quickly and efficiently. This led me to One Data: **One Data Cartography** software enables data experts to collaborate across different data silos in a fast, automated and quality-assured way. This creates new and deeper insights that can ensure a market advantage. In addition, One Data enables data teams to implement modern management concepts such as Data Mesh - making enterprise-wide scalability of data possible at any time. Therefore, I consider One Data to be one of the most promising companies in this field. I am very excited about the unique opportunity to help shape One Data's continued path to success.“

## About One Data

One Data GmbH is a German software company and a leading name in the use of applied artificial intelligence (AI). Founded by Dr. Andreas Böhm in 2013, the company – with its 300+ employees in Passau, Munich, Frankfurt and Berlin – provides an AI-powered Data Product Builder designed specifically for innovative and collaborative data teams. This enables such teams to create and use comprehensive data products, establish a data-driven culture and unlock the full potential of data. The One Data team helps customers improve data quality through powerful AI analytics and implement new data architectures such as data mesh. Data Product Builder makes it quick and practical to implement data projects: data is transformed into identifiable, reliable, system-compatible and secure data products. As a result, data assets no longer remain inaccessible, incomprehensible information sequences reserved for experienced data experts alone. Instead, they become data products available to everyone in the company for application in use cases. The outcomes include more stable supply chains, more accurate forecasts, faster R&D processes and more efficient data teams.
